

INDIVIDUAL QUICK FREEZER

GIQF

* INDIVIDUAL QUICK FREEZER

our continuous operating spiral lines perform environment cooling, rapid cooling, rapid shocking or heating processes depending on the processing type. Beside these, they can also be used for transport and transfer purposes in production areas at different levels a conveyor transport system without the need for lubrication is available. We have different types of conveyors we manufacture for different products and these conveyors provide a perfect air passage surface. All dynamic structure details are calculated according to the product geometry, product entrance and exit temperatures, cabin inner temperature values, energy needs, thermal treatment completion duration.

MODEL	(mm) DIMENSIONS						CAPCITY t/h	MOTOR	TEMPERATURE FREEZER ROOM	POWER
	A	B	C	D	E	F
