

## E STEAM PEELER

GESP

### \* E STEAM PEELER

It Is Used For Large Production Capacities and it is the latest in our company's modern science. It reduces the value of waste in the product to a minimum, which increases the volume of production. You achieve higher profits for the product. Less processing time and high quality. The collection basin before entering the peeler works automatically according to the required capacity. The pot is shaped and shaped by a Konic oval model. It has the European quality certificate atex. The peeling vessel designed to be closed well and it included unique parallel motion door. The high-pressure vessel contains an innovative product mixing design that enables rapid heat transfer of the steam to each product's surface.

MODEL	(mm) DIMENSIONS				CAPCITY t/h	MOTOR	STEAM	CAPACITY FOR COOKING POT
